About the Railway Tie Association and Its Mission

The Railway Tie Association (RTA) was established in 1919 as the National Association of Railroad Tie Producers, evolving from earlier groups dating back to the late 1800s. In 1932, the organization officially became the Railway Tie Association.

RTA’s mission is to ensure a strong and sustainable wood tie market. The association is deeply involved in crosstie design research and promotes responsible forest management, timber conservation, efficient timber processing, wood preservation, and worker safety.

The association’s objectives include:

- Supporting the research, development, and innovation of crosstie design, manufacturing, and usage.
- Collecting and providing key industry statistics.
- Developing and publishing industry specifications.
- Promoting and maintaining high quality standards for crossties.
- Engaging in government affairs.
- Collaborating with related organizations.
- Hosting annual meetings, seminars, and other educational events.
- Publishing various industry-related materials.

Why are railroads switching to QNAP[®] crossties?

Wood protection you can **trust**.

Backed by 65+ years of field use in utility poles and 1000+ years of cumulative global efficacy data.

Because QNAP[®] crossties:

1. are **THE SAFEST** in the industry.
2. offer the **LONGEST LASTING** protection in the industry.
3. are **SUSTAINABLE** with the **MOST** end-of-life options.

Contracting or Consulting Services: Lee Inspected Wood Products Inc. is a leader in the industry and a leading inspection service when quality counts.

Our field staff will perform 100 percent inspection of your poles before and after treatment. Our goal is to save money for your company by reducing early replacement costs and extending service life of the pole, which is the backbone to all your transmission and distribution systems.

Lee Inspected Wood Products also provides inspection services for cross tie and switch tie producers, class A railroads and short line users. Our quality service and inspection assurances are recognized worldwide in new product inspection.

The office staff at Lee Inspected Wood Products Inc. provides our customers with computer generated inspection reports and quarterly or annual summaries, which can be customized to fit the individual customer's needs. Our inspection service is the best in cost-saving measures and achieving total quality for you, the customer.

LORAM TECHNOLOGIES, INC.

Products Produced or Sold: Loram Technologies is working on the latest innovations in inspection services, ballast technologies, friction management, and infrastructure monitoring. Aurora® has set the standard for tie inspection, scanning the surface of wood ties and assigning grades. Aurora Xi™ takes inspections even further, using backscatter x-ray technology to look inside wood ties. Our tie marking solution utilizes data from these inspections to make it easy for tie gangs to identify replacement ties. Once the ties in need of replacement have been identified, the LTI Tie Set Out solutions will distribute replacement ties exactly where they are needed.

BallastSaver® can calculate deficiencies in your ballast profile and automate ballast delivery when integrating with GateSync® software, and Solaris® gates. We're experts in Friction Management installation, unit services, and remote monitoring. Our friction modifiers and gauge face grease are able to deliver benefits to your rail line. Our

RTA POLICY STATEMENT ON COMPLIANCE WITH ANTITRUST LAWS

The principal goal of the RTA is the collective effort of its members to improve the wood crosstie industry for the mutual benefit of everyone connected to the industry, including the members, their customers, and their suppliers.

Achieving this goal depends upon a free exchange of ideas, information, and the cooperation and contribution of all members. In order that each member may participate, confident that their communications and activities are safely within the requirements of the law, RTA reminds its members that the following practices are not permitted:

- Agreeing to fix or set prices, markups, or the terms of a sale.
- Agreeing to fix territories or allocate customers.
- Promoting a boycott of any producer or supplier.
- Agreeing to limit the quantities of products.

The purpose of this policy is to encourage the free exchange of information and to ensure compliance with all the applicable laws or regulations. Any member who has a question about any activity or communication is encouraged to bring their concern to the attention of the association and to consult appropriate counsel.
